- Provide cross-over Working Group information sharing to provide overall context given multiple Working Groups touch each other
- Identify alternative opportunities to engage neighbors to participate in Working Group discussions

Summary:

The Transportation and Parking Working Group opened the meeting with a welcome and introductions.

The meeting included a discussion around several big ideas for the Mount Vernon Campus to include transforming the topology to make it an accessible campus, creation of new athletic program space, and

development of an “urban retreat” while preserving the unique nature of the campus. Brief discussions were held on opportunities for neighbor engagement and utilization of the campus to create a win-win strategy.
