Re: Zoning Commission Case No. 06-27,
Square 54 PUD, Requested Images

Dear Chairperson Hood and Members of the Commission:

At its March 26, 2007 Special Public Meeting, the Commission voted unanimously to take proposed action on the above-referenced application and requested that the Applicant provide additional depictions of the revised project design. Accordingly, the Applicant respectfully submits the following materials addressing the Commission’s requests:

- Improved perspective of the original and revised office design shown from Washington Circle;

- New rendering of the office and residential components of the Project from the west side of Washington Circle; and

- A section clearly depicting the changes in building, floor-to-floor, and floor-to-ceiling heights for the office component, including the modifications along Washington Circle that were made to ease the transition between the lower and taller portions of the structure while maintaining an appropriate height of approximately 90 feet at the Circle;
In addition, the following chart summarizes the changes made from original Project design to the Project design submitted on March 12, 2007:

<td>91”3 rising to 114’9” (transition of 23’6”)</td>
</tr>
</tbody>

</tr>
<tr>
<td>Residential Component</td>

</tbody>

As indicated in the Applicant’s March 12, 2007 submission, these modifications resulted in a net loss of 32,559 square feet of gross floor area for the Project (0.21 FAR); however, as previously submitted by the Applicant and noted by the Commission at the March 26 special meeting, the Applicant will maintain the full array of amenities and public benefits proffered in connection with the Project.

Thank you for the time and attention you have given to this matter to date, and for your continued consideration.

Very truly yours,
