October 11, 2012

To Residents of FSK, JJ and Potomac Halls:

The university was informed today that PEPCO will be conducting work starting tonight in the midblock alley bounded by 20th and 21st Streets and between F and G Streets as part of the effort to connect electrical service to the Law Learning Center Garage project in the same block.

Since this work is not being conducted by the university and public utilities are allowed to do this type of non-emergency work in evening/night hours so as to minimize traffic disruptions, this work will begin after 7:00 p.m. and will last until the early morning hours. This work is also scheduled to occur next Monday as well as several other nights to be determined evenings in coming weeks.

While we have been told this work will not be excessively noisy we did want to notify you since it will be outside of GW’s normal hours of operations for construction. And, even though we do not have control of when PEPCO conducts its work we will continue to provide you information as we are informed of their work schedule. Please email talktogw@gwu.edu if you have any questions or concerns and, in advance, thank you for your continued cooperation and patience as we work on this project.
