STANDARD EROSION AND SEDIMENT CONTROL MEASURES AND SEQUENCE:

1. Standard practices of grading and curbing design and sediment controls shall be
   followed as stated in the standard practices of grading and curbing design and
c   sediment controls, which are to be supplied by the designer and approved
   by the Architect.
2. Standard practices of grading and curbing design and sediment controls, which are to be
   supplied by the designer and approved by the Architect.
3. Standard practices of grading and curbing design and sediment controls, which are to be
   supplied by the designer and approved by the Architect.
4. Standard practices of grading and curbing design and sediment controls, which are to be
   supplied by the designer and approved by the Architect.

EROSION AND SEDIMENT CONTROL NARRATIVE:

Preliminary Protective Measures to Prevent Erosion During Construction:

1. Preliminary Protective Measures to Prevent Erosion During Construction:
2. Preliminary Protective Measures to Prevent Erosion During Construction:

EROSION AND SEDIMENT CONTROL NOTE:

1. Erosion and Sediment Control Note:
2. Erosion and Sediment Control Note:
3. Erosion and Sediment Control Note:
4. Erosion and Sediment Control Note:

TOTAL SITE AREA: 10,200 SF

TOTAL VOLUME OF CUT BELOW GRADE EXCAVATION: 0 CF

TOTAL VOLUME OF CUT: 42,211 CF

TOTAL VOLUME OF CUT FOR UTILITIES:

TOTAL VOLUME OF CUT AND FILL: 14,890 CF

TOTAL AREA OF DISTURBANCE: 25,980 SF

CONSTRUCTION DATES:

The proposed work is to commence April 10, 2017 and is anticipated to be
complete by the end of September 2017.
